

Think about any information or image you have put online about yourself.  
 This is part of your **digital footprint**.  
 Record in the table below as many incidences of your own **digital footprint** you can think of

	What was the information?	Where was it posted?
		
		
		
		
		
		
		

Now work with a partner to colour code the incidences with highlighters using the following codes:

**RED = dangerous**

**BLUE = safe on certain sites**

**Green = always safe**
